

Delivering Enterprise AI

From Architecture to Real-World ROI

Adam Stephensen

Principal AI Architect

Choose the tool that best fits your needs

Most agents can be built using either of these differentiated tools – all powered by Azure AI Foundry

Low Code

Rapid authoring in visual canvas

Use prebuilds & defaults

Managed SaaS with single price

Low Code / Pro Code

✓ Ground in company data

✓ Enterprise-grade security & governance

✓ Act across systems & channels

✓ Latest capabilities, models & tools

✓ Integrate with UI for AI

Pro Code

Customize / control services used

Technically skilled users

Existing DevOps processes

Agent

Agents seamlessly connect and work together

Agent

Copilot Studio

1-click publish to 15+
internal & external channels

Connected Agent

Built-in Memory

Prebuilt actions +
Custom Plugin Actions

Knowledge Tools
Azure AI Search, Bing, Fabric, SharePoint

Default Prebuilt
Orchestrator

Foundry Models

Channels

Multi-Agent Orchestration

Memory and Threads

Actions

Tool Orchestrator

Foundational Models

Visual Studio + GitHub

Publish to 15+ channels via
M365 Agents SDK

Multi-agent workflow
Connected Agent
Agent Framework

Built-in or BYO with
Cosmos DB

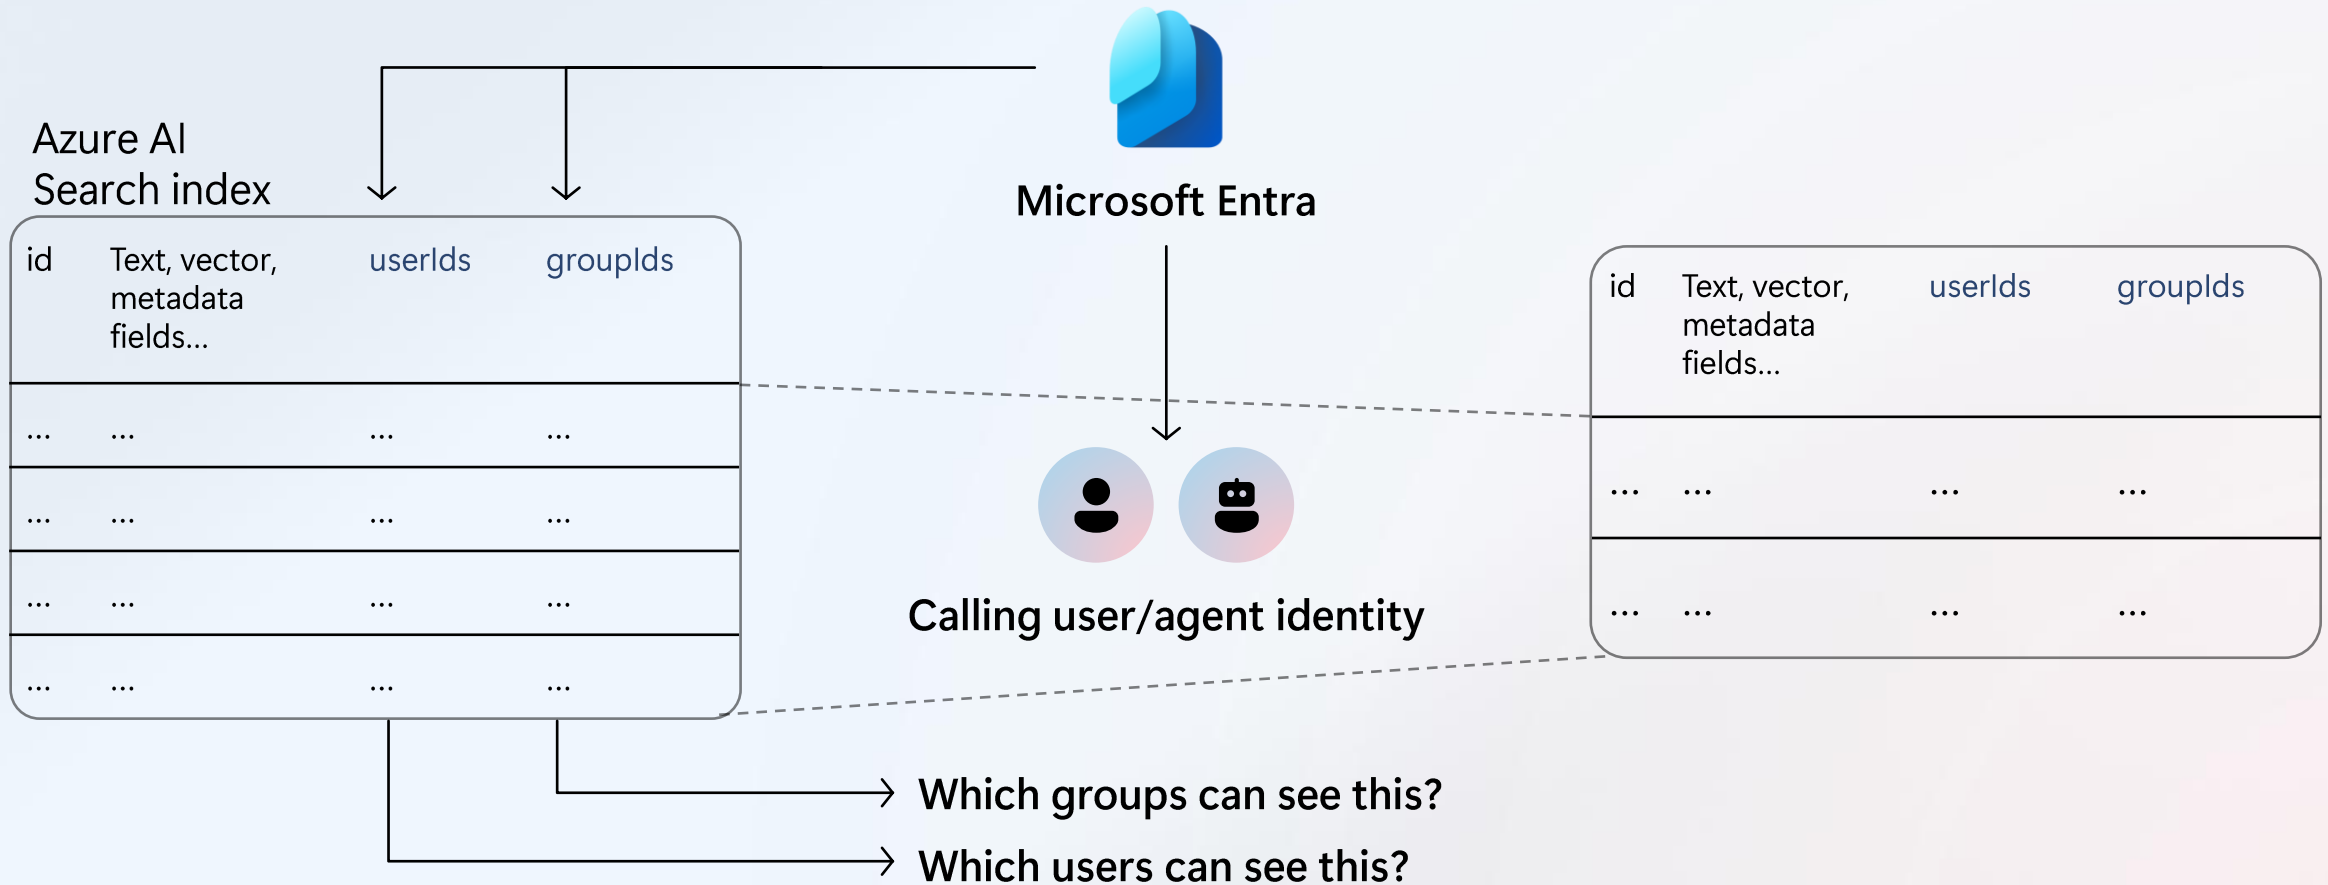

Action Tools
Logic Apps, Functions, OpenAPI, MCP

Knowledge Tools
Azure AI Search, Bing, Fabric, SharePoint

Foundry Agent Service

Foundry Models

Native Entra-based access control

Components of a high-quality RAG

1

Sophisticated LLM

Adheres to instructions
Supports function calling

2

Well prepared data

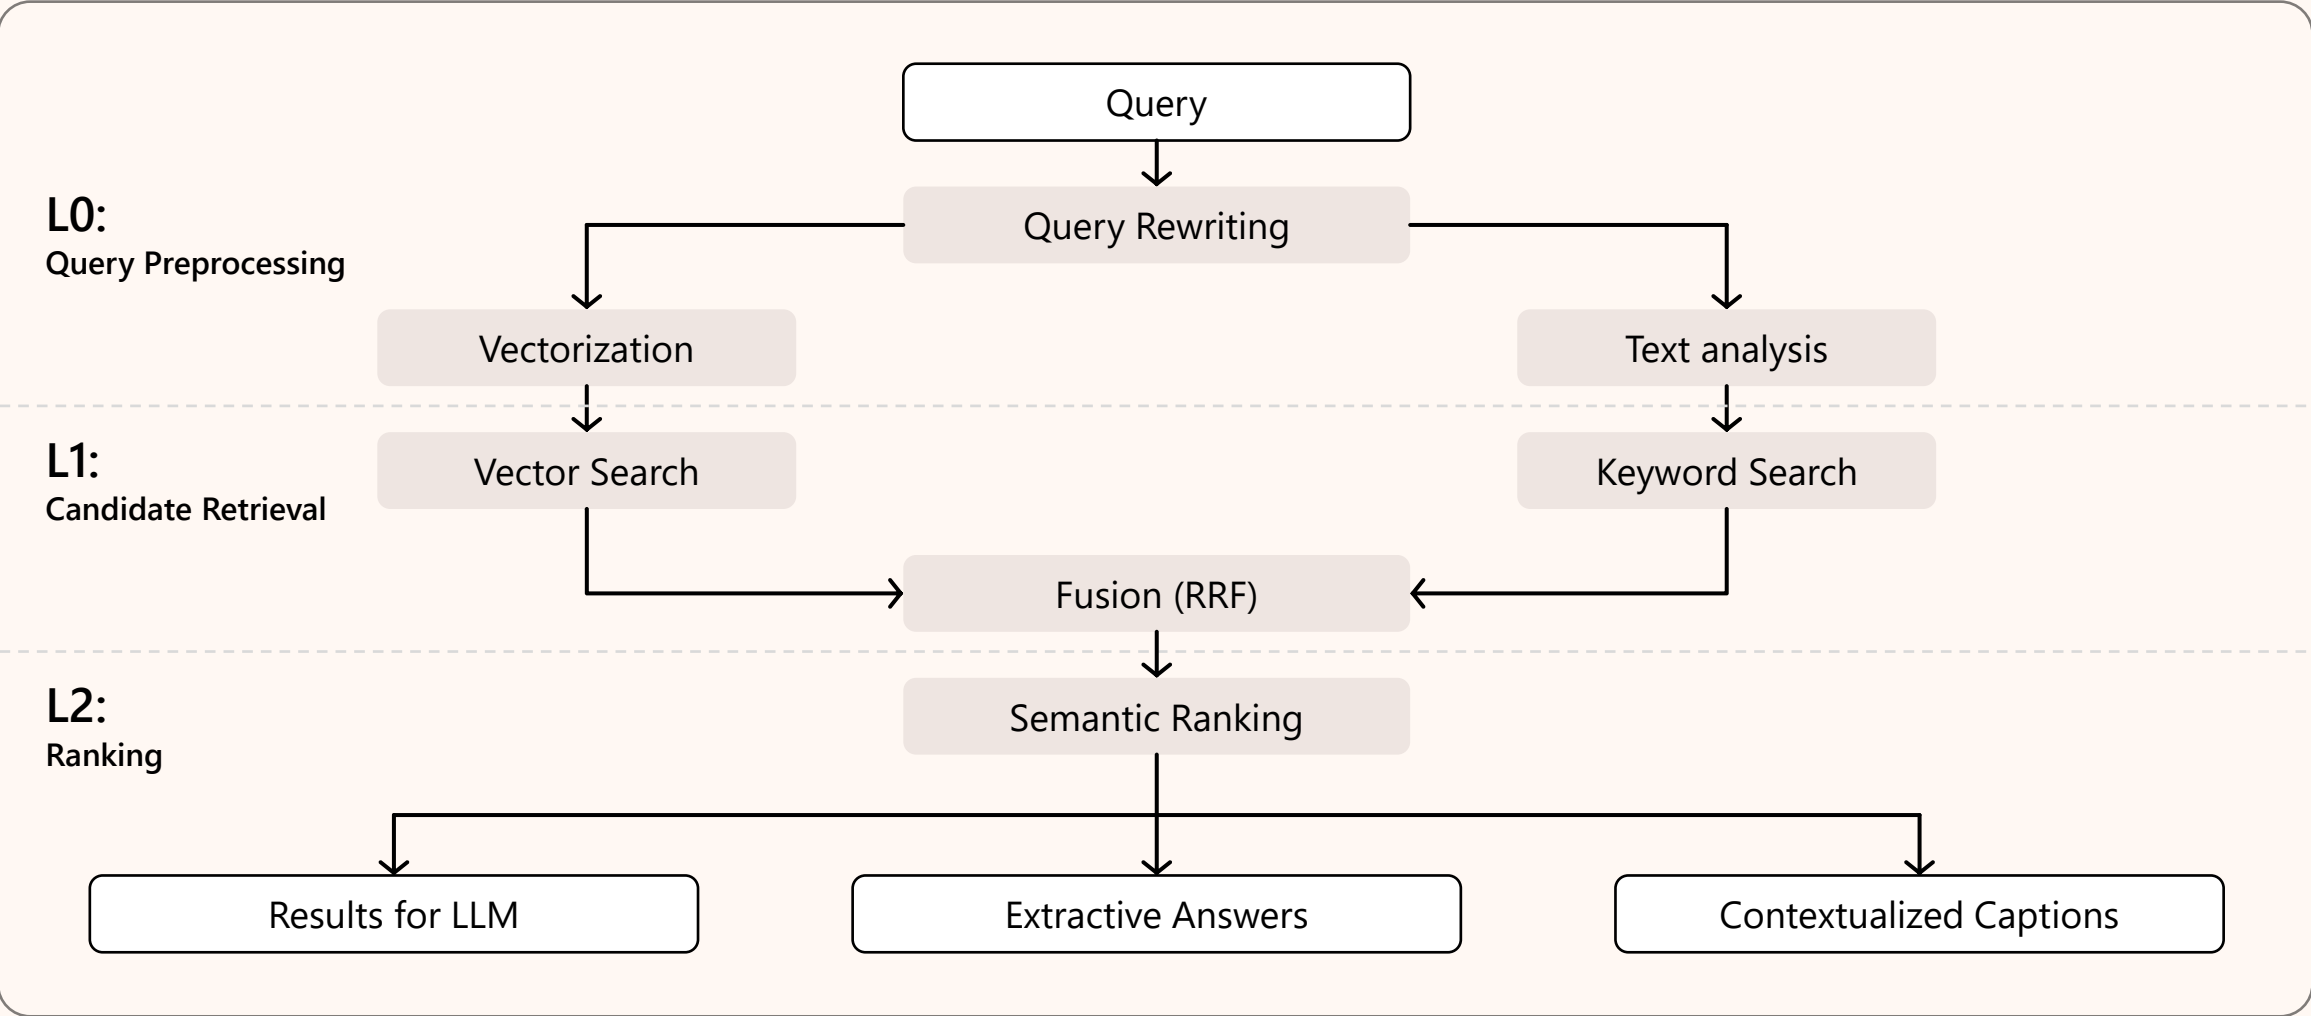

Reasonably sized text
Meaningful vectors

3

Powerful search functionality

Vector search
Hybrid search
Semantic re-ranking
Filtering

Recap: Azure AI Search Query Pipeline

RAG can struggle with complex queries

Works

security updates KB4048959

copay cost

Doesn't work

what does KB4048959 fix
and what systems is the
patch compatibel with?

whats the difference in
costs for copays vs split
pays

Agentic retrieval engine

Azure AI Search

Contextual
retrieval

Query
planning

Parallel
queries

Document references
& activity log

aka.ms/agentRAG

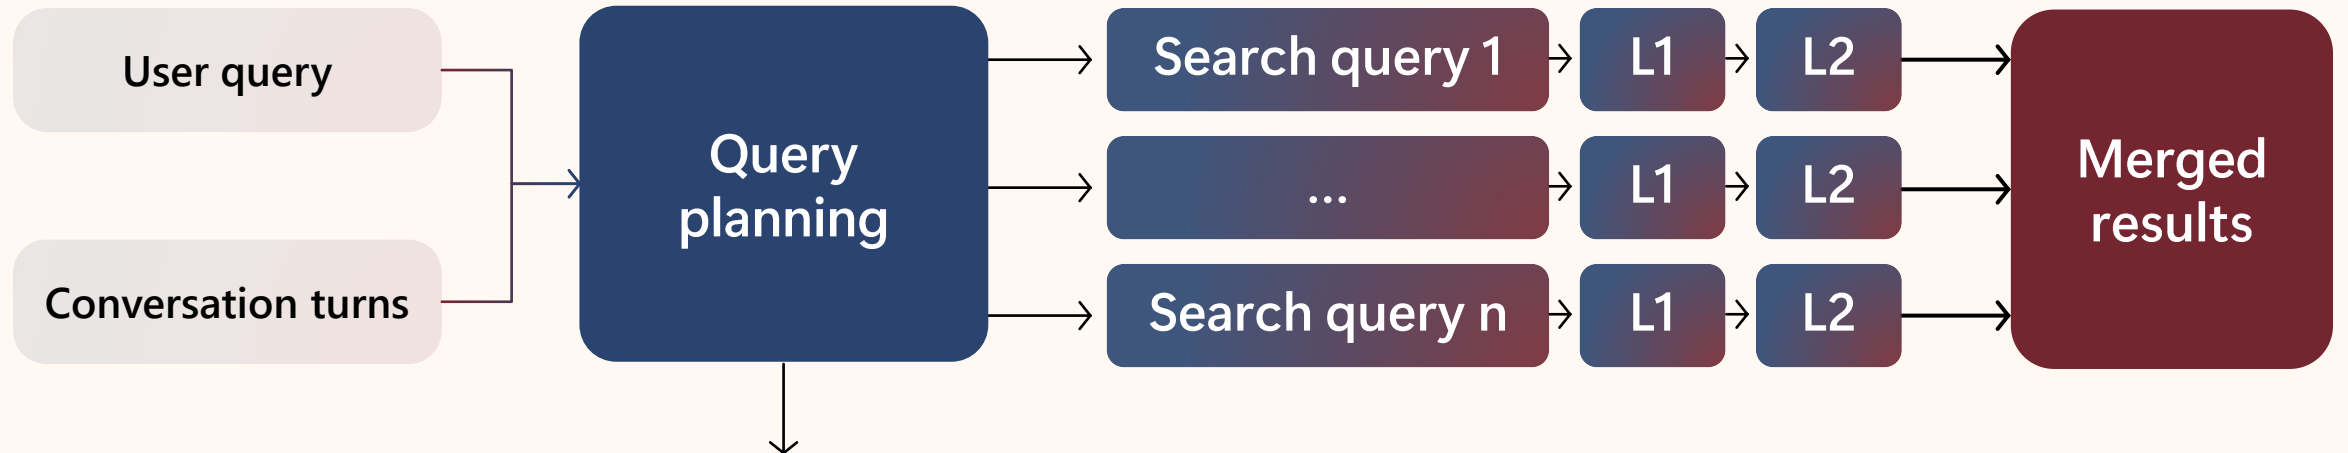

Agentic retrieval engine

Agentic methods applied to retrieval

Query planning

Fan-out query execution

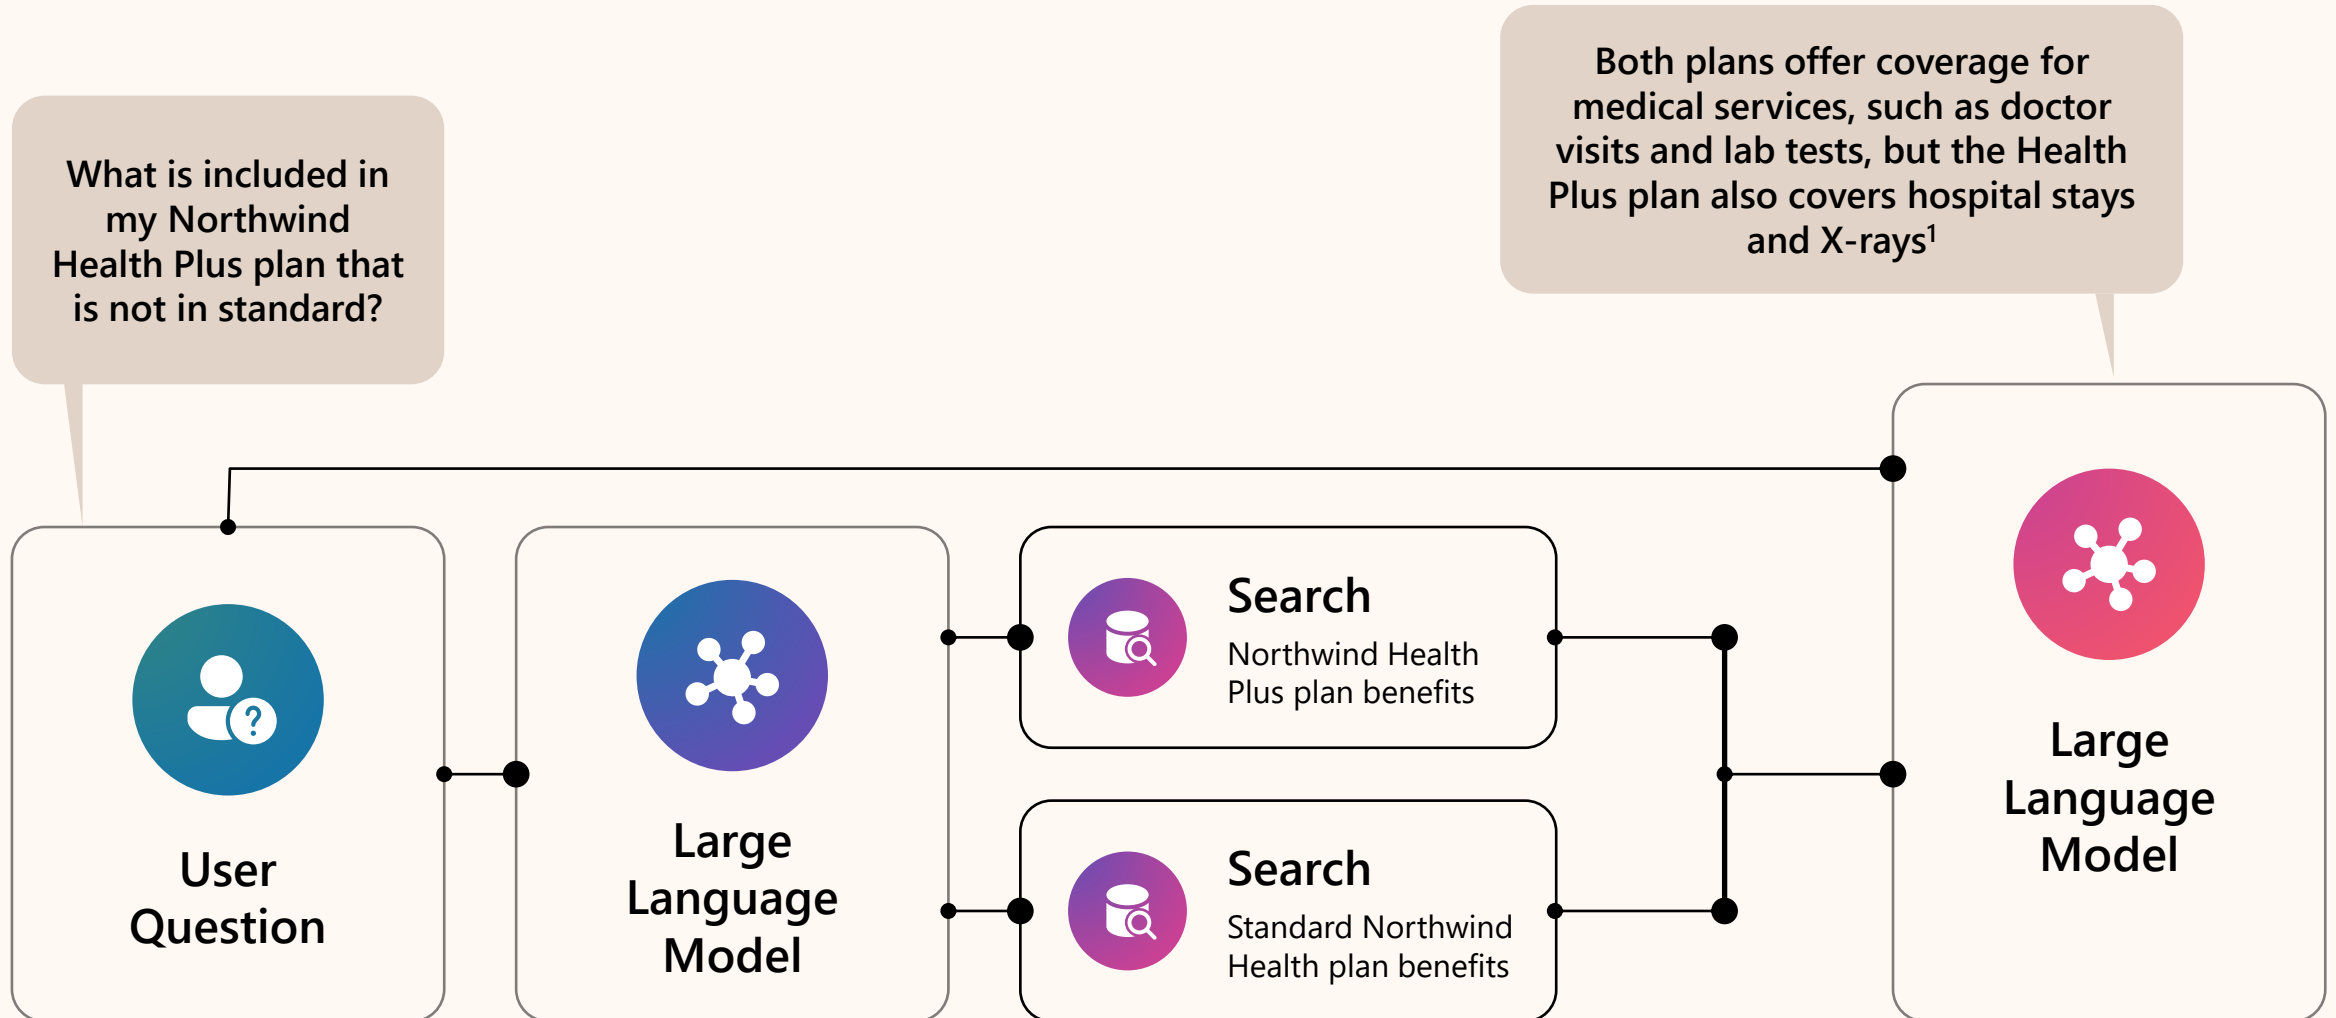

Results merging

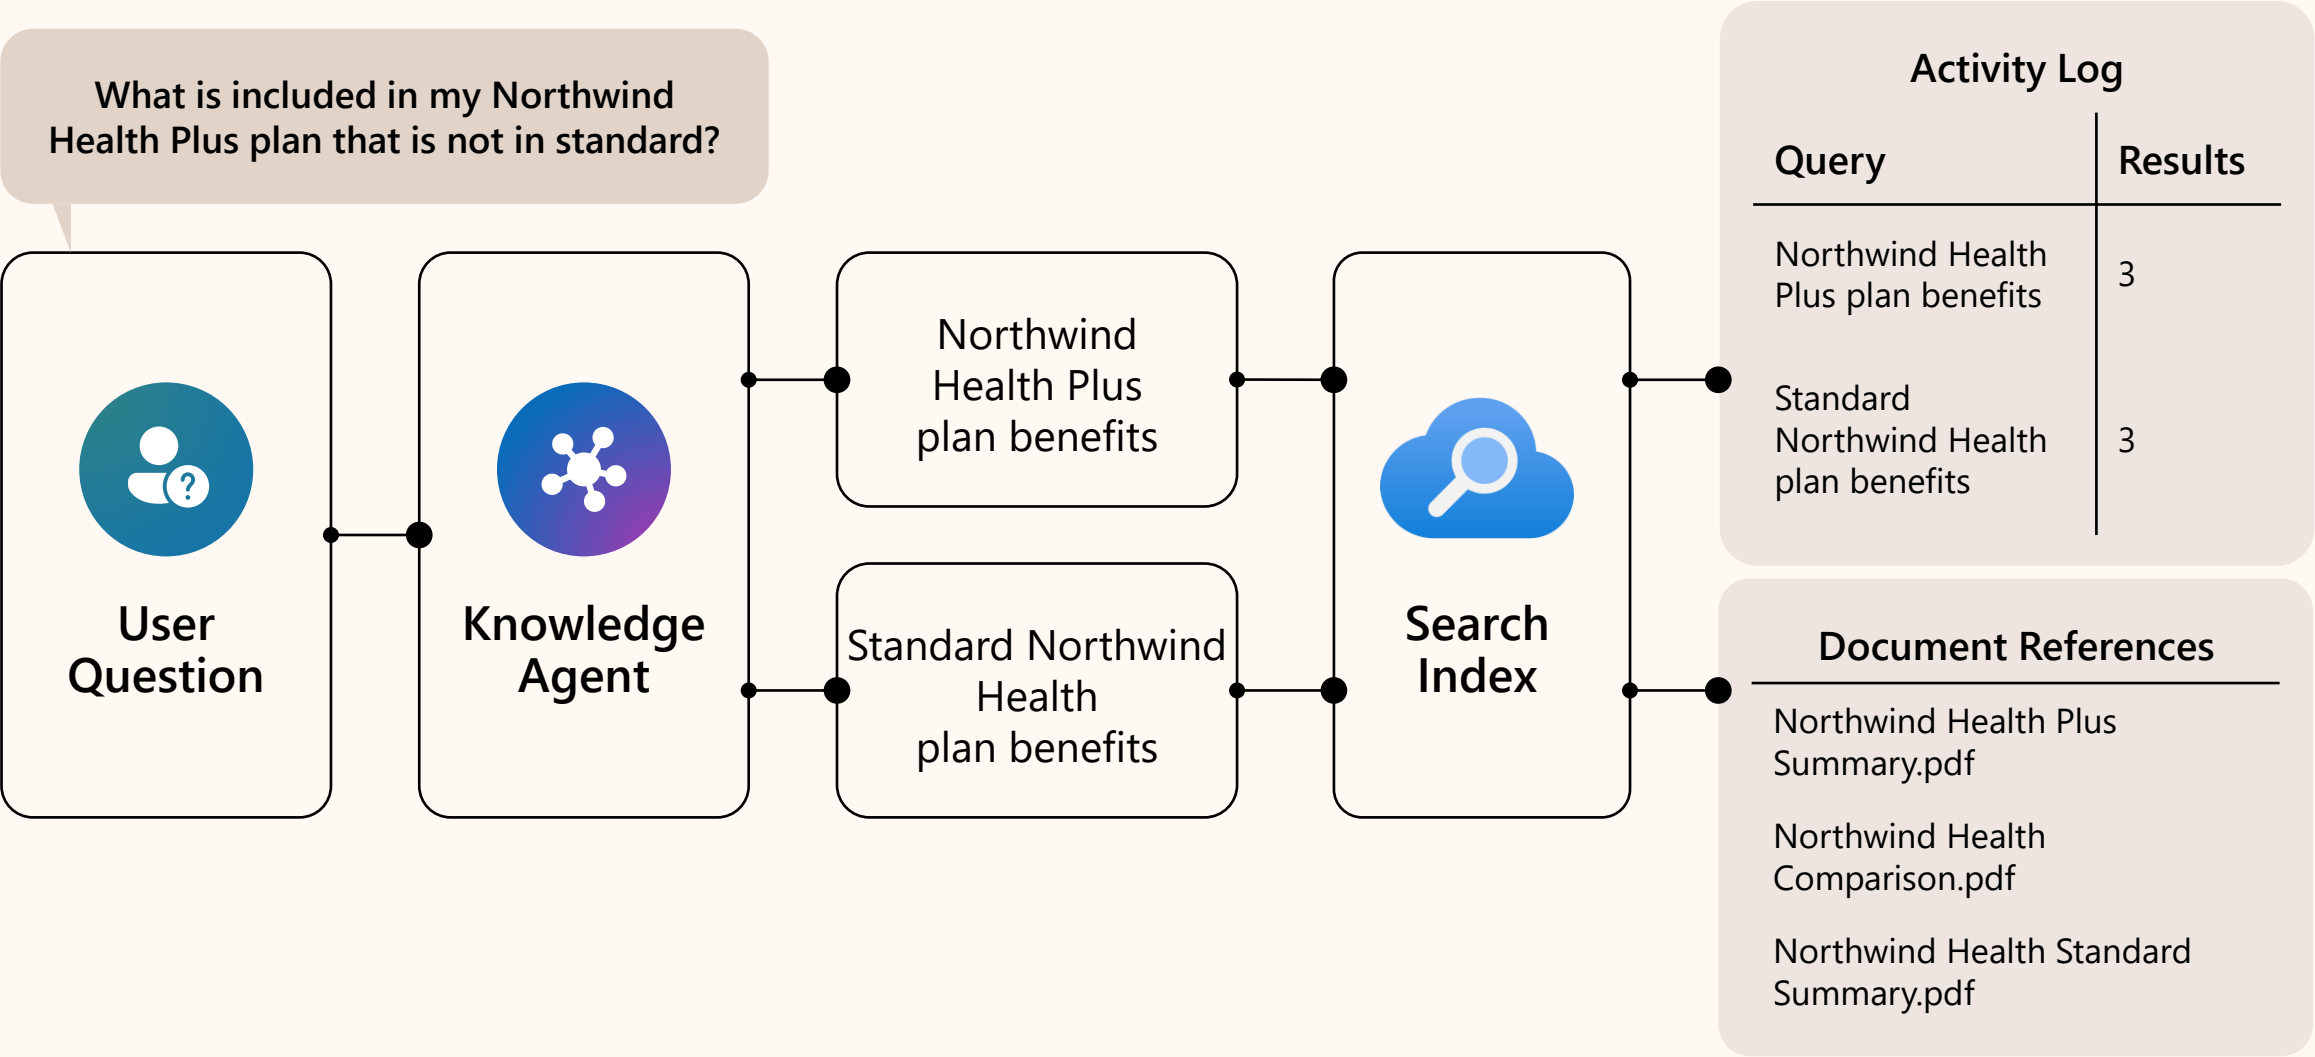

Single LLM call

Use conversation history for context • Correct spellings in context • Decompose queries as needed • Paraphrase queries

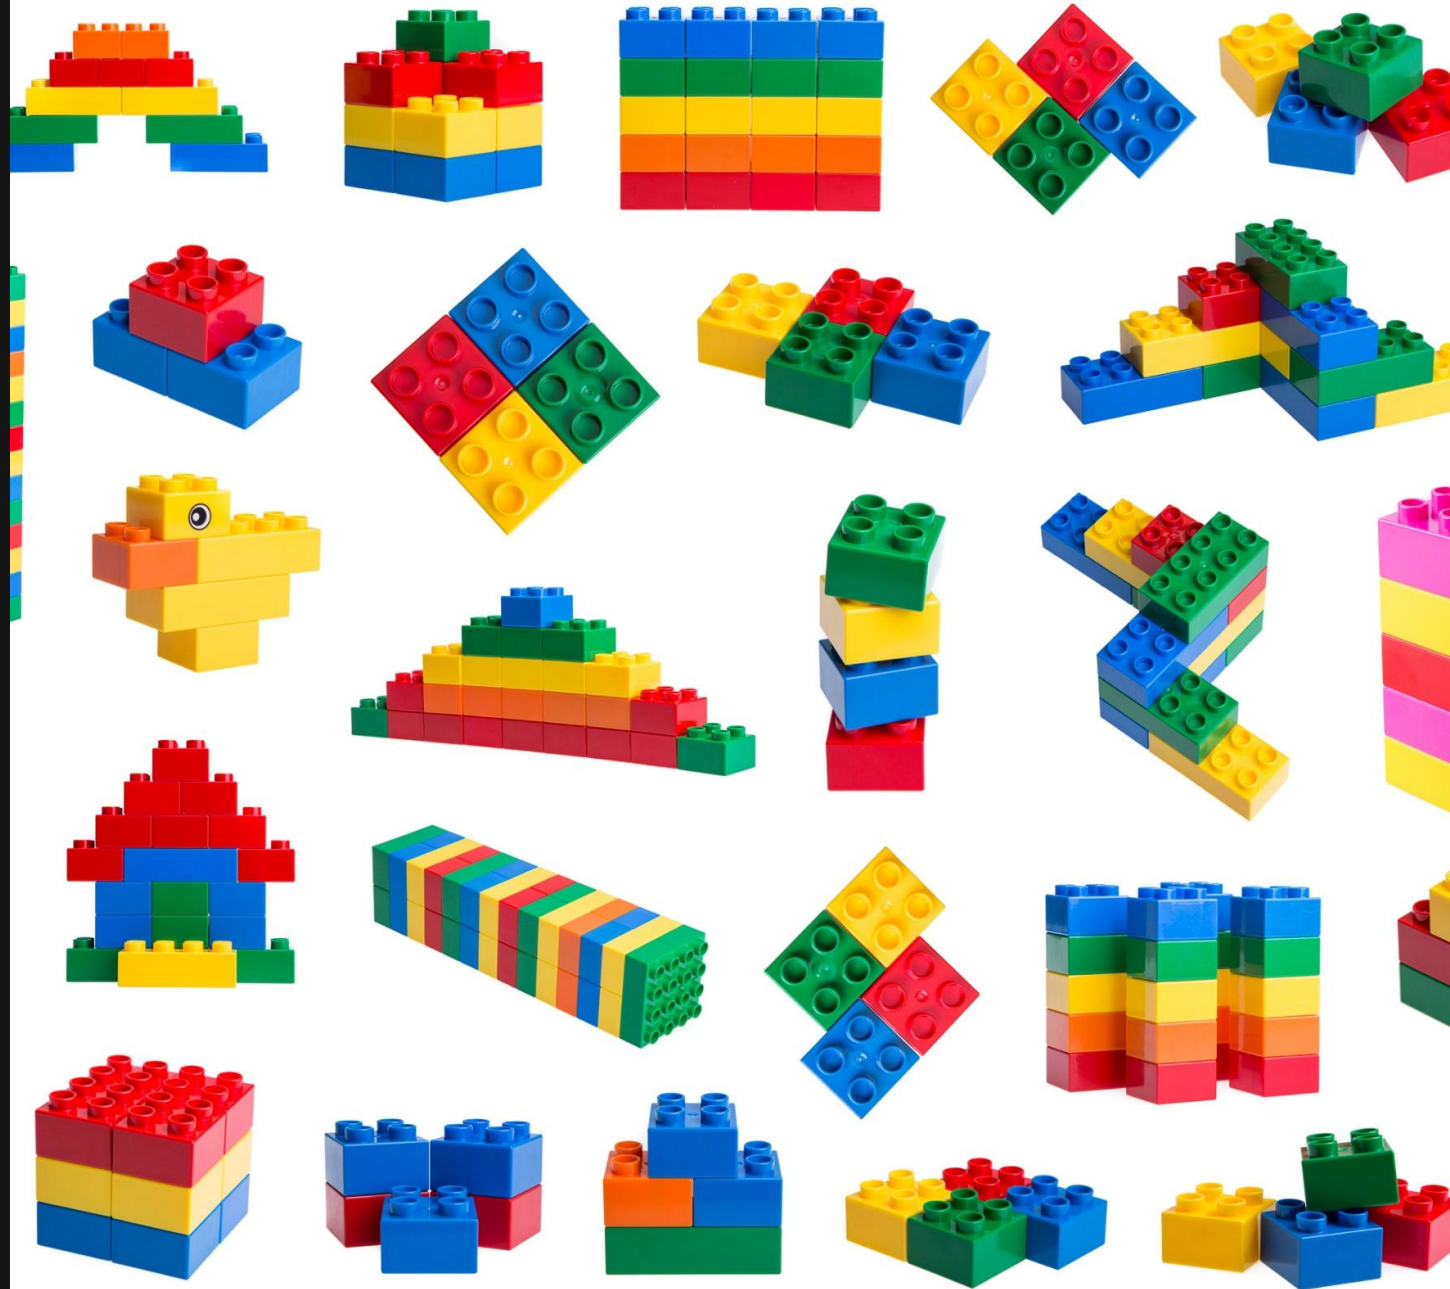

What is agentic retrieval in Azure AI Search?

Agentic retrieval engine in Azure AI Search

Model Selection Regional Constraints

Global Standard Models

Region	gpt-5.4-mini, 2026-03-17	gpt-5.4-nano, 2026-03-17	gpt-5.4, 2026-03-05	gpt-5.2, 2025-12-11	gpt-5.1-codex-max, 2025-12-04	model-router, 2025-11-18	model-router, 2025-08-07	model-router, 2025-05-19	gpt-5.1, 2025-11-13	gpt-5.1-chat, 2025-11-13	gpt-5.1-codex, 2025-11-13	gpt-5.1-codex-mini, 2025-11-13	gpt-4o-transcribe-diarize, 2025-10-15	gpt-5-pro, 2025-10-06	gpt-image-1-mini, 2025-10-06	sora-2, 2025-10-06	gpt-5-chat, 2025-10-03	gpt-5-chat, 2025-08-07	gpt-5-codex, 2025-09-15
australiaeast	✓	✓	✓	✓	-	-	-	-	✓	✓	✓	✓	-	✓	-	-	✓	✓	✓

Figure: the gpt-5, gpt-4.1, gpt-4o, o3, o4-mini models are available in Australia East as 'Global Standard' models.

Global Standard Deployment Summary

Benefits: Consumption (Serverless) Pricing, Wide model availability

Cons: Compute may execute outside Australia, potential throughput bottlenecks at scale

PTU Model Availability

Region	gpt-5.4, 2026-03-05	gpt-5.2, 2025-12-11	gpt-5.1, 2025-11-13	gpt-5, 2025-08-07	gpt-5-mini, 2025-08-07	o3, 2025-04-16	o4-mini, 2025-04-16	gpt-4.1, 2025-04-14	gpt-4.1-mini, 2025-04-14	gpt-4.1-nano, 2025-04-14	o3-mini, 2025-01-31	o1, 2024-12-17	gpt-4o, 2024-11-20	gpt-4o, 2024-08-06	gpt-4o, 2024-05-13	gpt-4o-mini, 2024-07-18
australiaeast	✓	✓	✓	✓	✓	✓	-	✓	✓	-	✓	-	✓	✓	✓	✓

Figure: The Open-AI models available as PTU in Australia.

PTU Deployment Summary
Benefits: Guaranteed throughput, Guaranteed compute and data residency in Australia
Cons: Higher Cost, Limited model availability

Standard Deployment Models

Region	gpt-5.1, 2025-11- 13	o4-mini, 2025- 04-16	gpt-4.1, 2025- 04-14	gpt-4.1- mini, 2025-04- 14	o1, 2024- 12-17	gpt-4o, 2024-11- 20	gpt-4o, 2024- 08-06	gpt-4o, 2024- 05-13	gpt-4o- mini, 2024-07- 18
australiaeast	-	-	-	✓	-	✓	-	-	-

Figure: Only gpt-4o and gpt-4.1 mini is available in Australia as a 'standard' deployment. gpt-4o is now retired.

Standard Deployment Summary
Benefits: Low cost, Guaranteed compute and data residency in Australia
Cons: Very limited model availability, potential throughput bottlenecks at scale

Data Zone Standard Deployment Models

Region	gpt-5.4-mini, 2026-03-17	gpt-5.4-nano, 2026-03-17	gpt-5.4, 2026-03-05	gpt-5.3-codex, 2026-02-24	gpt-image-1.5, 2025-12-16	gpt-5.2, 2025-12-11	model-router, 2025-11-18	model-router, 2025-08-07	model-router, 2025-05-19	gpt-5.1, 2025-11-13	gpt-5, 2025-08-07	gpt-5-mini, 2025-08-07	gpt-5-nano, 2025-08-07	o3, 2025-04-16	o4-mini, 2025-04-16	gpt-4.1, 2025-04-14	gpt-4.1-mini, 2025-04-14	gpt-4.1-nano, 2025-04-14	o3-mini, 2025-01-31	o1, 2024-12-17	gpt-4o, 2024-11-20	gpt-4o, 2024-08-06	gpt-4o, 2024-05-13
swedencentral	-	-	-	-	✓	-	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓

Figure: Broad model availability in Sweden Central as a 'data zone standard' deployment.

Standard Deployment Summary
Benefits: Low cost, Guaranteed compute and data residency in Australia
Cons: Very limited model availability, potential throughput bottlenecks at scale

Model Availability Summary

Deployment Type	Models Available	Residency	Use Case Fit	Compliance Notes	Risk Assessment (Global)
Provisioned Throughput (PTU)	GPT-5 family, GPT-4.1, o3-mini	Australia East	High-volume production, regulated workloads needing guaranteed performance	Meets strict residency and compliance requirements	N/A (AU residency enforced)
Standard	GPT-4o GPT-4.1 mini	Australia East	General enterprise apps, summarisation, multimodal tasks	Residency guaranteed; suitable for regulated sectors	N/A (AU residency enforced)
Global Standard	GPT-5, GPT-4.1, GPT-4o, o3/o4	Global (may run outside AU)	Advanced reasoning, long-document processing, agent workflows	Compute may execute outside AU; requires InfoSec approval for data sovereignty	Encryption in transit and at rest; contractual controls required; review GDPR and AU Privacy Act implications
Data Zone Standard (Sweden Central)	GPT 5-1 and 4.1 Family (NO GPT 5.1+ models outside USA)	EU Data Zone	Advanced reasoning, long-document processing	Complute exclusive in EU Data Zone covered by GDPR. Avoids US / Asia compliance risks	Encryption in transit and at rest; contractual controls required; review GDPR and AU Privacy Act implications
